DRUMS ROTATOR

Description:

The mixer drum (Drums or rotator) TFX220 allows to rotate drums from 55 liters to 220 liters to homogenize the contents.

It is firmly held by a retaining hook in the upper part and two retaining straps on its periphery.

The mixing time is set as a front view of the control box by means of a programmable timer.

The assembly is protected in an enclosure fenced and secure.

The drum turns off automatically in the upright position so as to simplify the installation or removal of drums.

In a simple design, it is robust and requires very little maintenance.

USEFUL INFORMATION

Our offices are open Monday to Friday from 8am to 18pm. Outside these hours thank you for contacting us by e-mail, we will respond quickly.
