ON SITE TRAINING

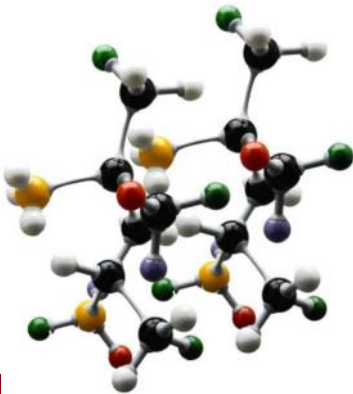

FOR CONTINUOUS SANDWICH PANELS LINES

Description:

Having visited and realized expertise on over fifty production lines of sandwich panels in the world, we have seen that there are many gaps in terms of training. With a wealth of experience in this field, we offer training on your production site into two parts. The **basics of polyurethane chemistry** and the **production line**.

Highly detailed, this training takes place in the meeting room with video projection and visits to the production line to create a relationship between your process and the theoretical ideal process.

A 100-pages guide is provided along with training and accompany you throughout your career.
